I respectfully urge the FCC to reject the NAB's petition 04-160 because of the following reasons. 1. It is not the NAB's decision as to what type of programing I am permitted to hear, especially since I pay for the service.

2. Since I drive a tractor-trailer I need current and updated traffic and weather information long before I am in range of tradition broadcast stations in the metro areas. This allows me to make route changes before my vehicle becomes part of the traffic problem.

3. I pass this information to other truck drivers keeping them from becomeing part of a traffic problem.

4. If Broadband over powerlines becomes a reallity, there will be no reception of am or fm radio stations unless you are very very close to the transmitter.

5. The service I pay for cannot be duplicated by tradition am or fm radio stations
